PROFESSIONAL SUMMARY

Technical Product Manager with a CS background and 4+ years of product experience across EdTech, Enterprise SaaS, and D2C eCommerce. Started as a frontend developer in React.js and TypeScript, which means I can sit in an engineering conversation, catch a bad spec early, and unblock a distributed team without needing a translator. Comfortable working async-first, writing clearly for remote audiences, and keeping cross-time zone stakeholders aligned without relying on a single sync call. Shipped features to 1M+ users, drove 20% task-completion lifts for Fortune 500 clients, and have hands-on product experience owning the backlog and delivery of an enterprise GenAI conversational assistant. CSPO and CSM certified.

CORE COMPETENCIES

Strategy & Discovery: Product Roadmap, OKRs, MVP Scoping, Jobs-to-be-Done, Competitive Analysis, Go-to-Market

Execution: Agile, Scrum, Kanban, PRDs, User Stories, Backlog Prioritisation, Sprint Planning, SDLC

Research & Data: User Interviews, A/B Testing, Funnel Analytics, Customer Journey Mapping, Usability Testing

PM Tools: JIRA, Confluence, Figma, Azure DevOps, Miro, Firebase, Mixpanel, Hotjar, Notion, Linear, Loom

Tech Stack: React.js, Next.js, Vue.js, TypeScript, REST APIs, Azure, GCP, Firebase, Azure OpenAI, LangChain, RAG

Remote Practices: Async-first communication, written documentation, Loom walkthroughs, cross-time zone stakeholder management

PROFESSIONAL EXPERIENCE

Grras Solutions | *EdTech platform for IT training and cloud certifications*

Aug 2025 – Present

Jaipur, India | Remote

Product Manager

- Built a 6-month product roadmap across 3 workstreams in JIRA and Azure DevOps; introduced standardised PRD templates that cut requirement-to-sprint time by 30% and kept scope creep from becoming a recurring problem.
- Reduced UI revision cycles by 40% by running Figma-led async alignment sessions between design and engineering, so wireframes went to devs as ready-to-build specs without back-and-forth.
- Set up KPI dashboards in Firebase and Mixpanel to track learner activation and feature adoption; found 3 specific drop-off points that changed where we focused the Q4 roadmap.
- Ran Agile ceremonies for a fully remote 6-person team and kept zero sprint carryover across 10 consecutive cycles with no single sync call wasted.
- Shifted the team to OKR-based planning, which helped improve learner retention by roughly 15% in the first two quarters.

Maatie | *Self-funded D2C skincare brand | Founder sprint between roles*

Oct 2024 – Aug 2025

Jaipur, India | Solo remote venture

Founder & Product Manager | 0-to-1 Venture

- Conceived and launched a D2C skincare brand from zero to live in 90 days, owning discovery, UX in Figma, SKU strategy, and fulfilment flow entirely solo and fully remote.
- Ran 30+ async customer interviews to validate product-market fit before first inventory batch, cutting waste by 25%.
- Iterated on checkout UX using Hotjar heatmaps and session-replay data, driving cart-to-purchase conversion up 18% within 60 days of launch.
- Executed A/B tests on pricing, packaging, and messaging via Google Optimize, compressing reorder decision time from 4 weeks to 10 days.

Deliberately wound down to pursue a senior PM role. Entire operation ran remote with zero in-person dependency; proof of point for any distributed product role.

Product Owner

- Owned the product backlog for an enterprise GenAI conversational assistant; defined user stories, prioritised features across 4 query domains (services, careers, leadership, investor relations), and aligned distributed stakeholders on scope before each sprint.
- Set acceptance criteria and response quality benchmarks for the AI assistant's conversational flows; ran structured UAT sessions with international stakeholders across time zones to validate outputs before each release.
- Translated complex performance requirements around response speed and system reliability into sprint-ready stories; kept engineering focused on user-facing outcomes rather than infrastructure decisions.
- Maintained a healthy backlog and ran sprint ceremonies across a cross-functional team; reduced ambiguous developer queries by 35% through written story definitions and structured async syncs.
- Shipped 4 major releases on schedule over 2 years coordinating across a 12-person globally distributed team; cut story-clarification time from 3 days to same-day through documentation-first practices.

Tagbox | *SaaS UGC and social media aggregation platform, 1M+ users*
Jaipur, India

Aug 2021 – Apr 2022

Product Contributor & Frontend Developer

- Shipped customer-facing features to 1M+ users; defined JIRA acceptance criteria that reduced post-launch bug reports by 22%.
- Validated post-release performance using Mixpanel and Google Analytics across 3 consecutive releases, ensuring success metrics were met within 30 days of each go-live.
- Engineered scalable frontend components in React.js and TypeScript, translating business goals into scoped tasks with 100% on-time delivery.

Socialmeedya | *Digital product agency*
Jaipur, India

Jun 2020 – Aug 2021

Project Coordinator & Frontend Developer

- Facilitated 8 client-facing discovery sessions, converting qualitative feedback into prioritised JIRA backlogs that reduced post-delivery revision requests by ~30%.
- Scoped and delivered 3 product MVPs on time and on budget using Agile practices, each with clearly defined success metrics agreed upfront.
- Built client-facing interfaces in React.js, Vue.js, and REST APIs, bridging technical execution with product requirements across all 3 MVPs.

SELECTED PROJECTS & CASE STUDIES

- **Sociovox:** Solo-built creator-management SaaS with content calendar, brand deal CRM, Gmail brand inbox, analytics dashboard, and Stripe billing (Free/Pro/Agency). Full-stack Next.js 14. Built and managed entirely remote.
- **WhatsApp Intelligent Inbox:** Designed AI-powered intent-classification system reducing message-triage time by ~60% in user testing; scoped full PRD with API integration spec.
- **Prama AI:** Formulated 0-to-1 product roadmap for an AI Governance & Risk SaaS targeting SMBs; incorporated EU AI Act and NIST frameworks across 3 monetizable compliance modules.

EDUCATION, CERTIFICATIONS & LEADERSHIP

B.Tech, Computer Science | JK Lakshmipat University, Jaipur | 2016 – 2020

Certifications: CSPO (Scrum Alliance) | CSM (Scrum Alliance) | Google Project Management Certificate

Leadership: President, Entrepreneurship Cell (AIC) & Dance and Drama Club at JKLU. Managed both organisations simultaneously in final year.
